

Print dos comandos de migration do terminal

```
(hase) PS C:\Users\ginno\OneDrive\facul\cp c#\ProjetoRM98047> dotnet ef migrations remove
Build started...
Build started...
Build started...
Removing migration '20250904233329_Inicial'.
Removing model snapshot.
Done.
(hase) PS C:\Users\ginno\OneDrive\facul\cp c#\ProjetoRM98047> dotnet ef migrations add Inicial
Build started...
```

Obs: eu usei este comando que mostra todas as minhas tabelas q eu tenho criada no dbeaver, e as tabelas com solicitadas neste cp estão presentes

Este é o comando caso queira saber **SELECT** table_name **FROM** <u>user_tables</u>;

Print das tabelas preenchidas direto do db
